

HOW TO CHOOSE THE CORRECT SIZE OF YOUR SUIT.

1. ASK SOMEONE TO TAKE YOUR BODY MEASUREMENTS.

When taking your measurements, it is important that you stand up straight and that you keep the measuring tape as close to the body as possible. See next page for information on how to measure and write down your measurements.

2. CHECK THE SIZE CHARTS AND CHOOSE THE CHART THAT CORRESPONDS BEST TO YOUR MEASUREMENTS. STANDARD, PLUS, TALL OR TALL/PLUS.

To ensure accuracy, check more than one size chart.

3. MARK YOUR MEASUREMENTS IN THE SIZECHART.

See the examples on the next page.

4. CHOOSE YOUR SIZE.

Choose a size that approximates the average of all your measurements. It is normal for your measurements to be spread out throughout different sizes. Our suits have enough allowance and range of motion to accommodate these variations. Soft bodyparts like the belly can be "compressed" a bit while head and neck measurements are not as important on a suit. If you're buying a drysuit it is important to take into consideration the thickness of the undergarment you usually wear. If you wear very thick undergarments you might want to consider a larger size for comfort. If you are unsure about what size to choose please contact your dealer.

5. CHECK IF THE SUIT IS AVAILABLE.

Look the suit up in the catalog and check if it is available in your size.

DISCLAIMER

Size really matters! Despite similarities in measurements or weight, every person's body is unique. Our size chart is a good starting point to estimate your size but because a wetsuit should really fit like a second skin, we highly recommend that you visit an authorized dealer to ensure a perfect fit. Although all our dry suits have a generous cut that allows plenty of room to comfortably fit a standard undersuit, the different thicknesses of different undergarments designed for various environments needs to be taken into account. The best way to achieve the perfect sizing is to test your dry suit with your own personal undersuit to make sure it fits perfectly. We advise specifically against buying from other sources. It is better to be safe than sorry, so please seek support from your local dealer.

Example 1: Men's Wetsuit

Richard most likely fits in both the ML and L sizes.

But as he explains, "I'm broad-shouldered, and when I buy clothes they are usually tight over the shoulders and back, so I opt to buy the larger of the two alternatives, or the size Large". The larger measurements on hips and neck-to-wrist are ok on either the ML or L sizes because a wetsuit is very stretchable.

MEN STANDARD

Men	3XS	XXS	XS	S	M	ML	L	XL	XXL	3XL	[cm]

Example 2: Ladies front zipped Drysuit

Lisa checks the size tables and finds that she is closest to a Medium Plus size in the PLUS size chart. She also checked the STANDARD size chart but found that the suits are too tall compared to her height. Therefore she chooses the M/+ size.

LADIES PLUS		(cm)	
Ladies	M/+	L/+	
European Size	D38	D42	
Height for Wetsuit	165-171	169-175	
Height for back zipped Drysuit	165-173	169-177	
Height for front zipped Drysuit	165-171	169-181	166
Head	55	56	
Neck	37	38	
Chest	95	103	94
Waist	75	82	76
Hips	102	110	102
Neck to Crotch	78	80	75
Neck to Wrist	72	74	74
Crotch to Floor (Drysuit)	79	81	81
Crotch to Ankle (Wetsuit)	70	72	
Dryboot size/Foot length	25	26	25
European Boot size	37	38-39	37

Lisa's measurements

How to measure

IMPORTANT!
Take body-near measurements

- 1 Body height
- 2 Head
- 3 Neck
- 4 Chest
- 5 Waist
- 6 Hips (Maximum hips circumference)
- 7 Neck-Crotch (from 7th cervical vertebra to center of crotch)
- 8 Neck-Wrist (from 7th cervical vertebra to wrist)
- 9a For Drysuits: Length from crotch to floor
- 9b For Wetsuits: Length from crotch to ankle
- 10 Foot length
